If you're under age 70 and are continuously disabled for more than 24 months but have not yet reached the aggregate amount (equal to your monthly benefit amount multiplied by 24 months), benefits can continue until the aggregate is reached or for 12 months, whichever occurs first. Your coverage ends on the January 1 that follows your 70th birthday. You are considered totally disabled if you can't perform the material and substantial duties of your occupation due to sickness or injury. You must be under the care of a licensed physician, and you can't be engaged in any other gainful occupation.
